EDUCATION

BTech, Computer Science and Engineering

2019-2023

Oriental Institute of Science and Technology, Bhopal Madhya Pradesh

TECHNICAL SKILLS

Javascript | ES6 | Node.js | Express.js | React.js | Redux toolkit | MongoDB | REST APIs | Ajax | React Query | Redis | Elasticsearch | HTML | CSS | Git | Python | Nosql

EXPERIENCE

Data Analyst

Hive.ai, Gurugram

(Dec 2023 - Present)

- Performing comprehensive exploratory data analysis to identify trends, detect anomalies, from large datasets.
- Implementing rigorous data validation processes to uphold data quality, ensuring seamless accessibility and reliability for meticulous and accurate analysis, thereby supporting informed decision-making and operational efficiency.

MERN Stack Developer

MRIKAL THOUGHTS PRIVATE LIMITED, Gurugram

(May 2023 - Nov 2023)

• SimplyfyQA:

- I played a key role in developing micro frontends for the QA app using **React.js** with my team of five.
- Developed robust API routes using **Nodejs and Expressjs** to ensure efficient and scalable backend functionality.
- Committed to successfully developing components from scratch for improved functionality and performance.
- Got the better understanding of team collaboration skills, branching, merge conflicts on **Git Hub**, Ux/Ui, backend, clean code, debugging and web technologies.

• Apache Superset:

- Worked on an open-source BI tool project by implementing client-side requirements, including developing new features, integrating **APIs**, and designing CSS templates for flexible theme customization to enhance user experience.
- Implemented Antcharts to improve data visualization, creating interactive and intuitive charts for enhanced analysis.
- Developed customizable plugins for each chart to improve data visualization, enabling more effective analysis.

PERSONAL PROJECTS

Social Media App

Github

- Tech Stack: frontend-Reactjs, React-Redux, Node.js, Express.js, MongoDB, Cloudinary, jwt, nodemailer, async/await
- A innovative web app which is like a social media app, where users can log in and create an account. Login users can post can follow other users and another user can follow that logged-in user. Users can like and comment on posts.
- Live here: **Social Media Demo**

E-COMMERCE-API

Github

- Tech Stack: NodeJs , ExpressJs, Javascript, JWT, nodemailer, Bcrypt, MongoDB, Render, SwaggerUI
- Developed a robust API that facilitates product ordering. By leveraging JSON Web Token security, product reviews creation, updation, and deletion.
- Employed the bcrypt JavaScript library to hash passwords before storing into mongoDB with round value of 10.
- Live here: **E-Commerce-API Demo**

Chatting Engine

Github

- Tech Stack: HTML5, CSS3, SCSS, JavaScript, Node.js, Express.js, Socket.io
- A real-time chatting platform enabling bidirectional communication between the server and clients.
- Live here: **Chatting Engine Demo**

ACHIEVEMENTS

Secured 7th position in state-level Web Hackathon

GeeksforGeeks: Solved 120+ questions

Leetcode: Solved 150+ questions
